TECHNOLOGY & BENEFITS

VIDEO

- >> **HDD/DVD-R/-RW Recorder** - Toshiba DVD recorders are designed to provide the greatest flexibility in recording and playback by supporting DVD-R and DVD-RW recordable disc formats. The right format for every application:
 - DVD-R is a write-once format perfect for sharing treasured video moments with virtually anyone who has a DVD-Video player.
 - DVD-RW is a rewritable format compatible with many of today's DVD-Video players and computer drives and can be rewritten up to 1000 times.
- Additionally, the unit comes with a built-in 160 Gigabyte TiVo® Series2™ hard disc drive. Recording shows on an HDD has several advantages over recording on traditional videotape including improved picture and audio quality, instant access to audio and video content, extended recording time, and no rewinding.
- >> **TiVo® Basic™ Service Included** - Easy recording from a 3 day on-screen program guide and TiVo® channel banner with program description. The unit also offers manual recording capability including scheduling, repeating, recording of specific time and channel slot via the on-screen user interface. Enjoy on-screen display of content with program name, rating, station identifier, and time and date.
- >> **ColorStream Pro® Component Video Outputs** - These outputs allow the highest quality video signal to be sent from the DVD player unit to a component video equipped progressive scan TV. When this connection is utilized with today's HD-compatible sets, typical NTSC artifacts-like video noise, dot crawl, and flicker-are virtually eliminated, resulting in a low-noise, highly detailed picture with unequaled color purity.
- >> **Digital Cinema Progressive (3/2 Pulldown)** - Delivers the smoothest, most film-like images to any progressive scan television, such as an HD-compatible one, and ensures maximum resolution.

AUDIO

- >> **WMA & MP3 Playback** - Recorded Compact Discs (CD-R & CD-RW) with music stored in either the Windows Media™ Audio or MP3 file formats can be enjoyed.

CONVENIENCE

- >> **TV Trick Play Features** (Pause Live TV, Rewind, Instant Replay) - This feature allows the user to begin watching a recording that is already in progress and pause live TV.
- >> **Front Panel A/V & IEEE1394DV Inputs** - There are composite video inputs as well as RCA L/R inputs on the front panel of the unit for easy camcorder dubbing. Additionally, an IEEE1394 Firewire jack is also available on the front panel for interfacing compatible digital video camcorders. Provides recognition of the device and on-screen menu controls to easily direct the "downloading" process.
- >> **IR Blaster for Cable and DBS Box Control** - This handy cable can connect to the back of the recorder and transmits an infrared (IR) signal to change channels on your cable or satellite box. Allows no-hassle recordings from these two sources without the need to make channel selection ahead of time.

SPECIFICATIONS

DVD	Disc Qty	1
	Disc Play	DVD-Video/CD/CD-R/CD-RW*/VCD/DVD-R/DVD-RW
VIDEO	Disc Record	DVD-R, DVD-RW
